

***When George, Mike, Terry and Wendy Adams, of Adams Steel, Anaheim, California decided to replace and upgrade their present shredding plant, they conducted a very thorough evaluation of all available equipment.***

***We are proud that they chose the 124 SXS Shredding Plant from The Shredder Company for this very important project.***

## **“124 SXS Shredding Plant”**

The latest in a long line of evolving shredder plants designed under the leadership of Scott Newell and Alton Scott Newell III. Oh, and by the way, 30 years ago when the Adams family bought their first shredder plant, they also bought it from the Newell family.

For the kind of equipment and service that creates long lasting relationships, please contact us.
